

# AIMO Proof Pilot — Final Grade

Problem (#\_ID): 6\_AMAZIN

Submission: team\_5

---

Scoring scale (0/1/6/7) — two binary decisions:

Step 1. Is the solution essentially complete?

- If **no**: award **1** for significant partial progress, otherwise **0**.
- If **yes**: award **7**, or **6** if there is a minor error or omission.

Grade against the **markscheme** (docs/markschemes.pdf).

## 1. Final mark

Final mark (choose one):

## 2. Reasoning

Justify the mark with explicit reference to the markscheme points (e.g. **ME1**) where possible.

Computes the ratio  $H_CQ/AQ$  incorrectly, and concludes that *amazing* numbers must be perfect squares, which is false. Nothing that gets credit on the markscheme.
