

AIMO Proof Pilot — Final Grade

Problem (#_ID): 5_POLYGO

Submission: model_4

Scoring scale (0/1/6/7) — two binary decisions:

Step 1. Is the solution essentially complete?

- If **no**: award **1** for significant partial progress, otherwise **0**.
- If **yes**: award **7**, or **6** if there is a minor error or omission.

Grade against the **markscheme** (docs/markschemes.pdf).

1. Final mark

Final mark (choose one):

2. Reasoning

Justify the mark with explicit reference to the markscheme points (e.g. **ME1**) where possible.

The solution completes the $N = 1$ case correctly (**NP11**). However, they eliminate the $N \geq 3$ case in an invalid fashion and whilst claiming to hit **PP2**, this relies on unjustified assumptions. Nothing that gets credit on the markscheme.
