

AIMO Proof Pilot — Final Grade

Problem (#_ID): 2_ALTORO

Submission: model_6

Scoring scale (0/1/6/7) — two binary decisions:

Step 1. Is the solution essentially complete?

- If **no**: award **1** for significant partial progress, otherwise **0**.
- If **yes**: award **7**, or **6** if there is a minor error or omission.

Grade against the **markscheme** (docs/markschemes.pdf).

1. Final mark

Final mark (choose one):

2. Reasoning

Justify the mark with explicit reference to the markscheme points (e.g. **ME1**) where possible.

For a coordinate/computational solution the constructed objects must be derived, but here the coordinates of E and F and the equation of the circumcircle Ω — all essential to what follows — are written down with no calculation, so key expressions appear from nowhere. For a computational write-up this is a major omission. The later steps (computing X and Q , identifying P as the midpoint of HQ , and showing the reflection E^* of H lies on Ω) are correct and reach the partial-progress milestone, but the unjustified construction stops the solution short of being essentially complete. It therefore scores **1**.
