

AIMO Proof Pilot — Final Grade

Problem (#_ID): 3_INDEX

Submission: team_5

Scoring scale (0/1/6/7) — two binary decisions:

Step 1. Is the solution essentially complete?

- If **no**: award **1** for significant partial progress, otherwise **0**.
- If **yes**: award **7**, or **6** if there is a minor error or omission.

Grade against the **markscheme** (docs/markschemes.pdf).

1. Final mark

Final mark (choose one):

2. Reasoning

Justify the mark with explicit reference to the markscheme points (e.g. **ME1**) where possible.

The script proves $N \leq 6$, which meets the partial-progress criterion. However the final claim that $N = 6$ is wrong — it does not account for the requirement that the quotients also have non-negative coefficients — so the solution is incomplete and scores 1.
